

How to Use the Casio fx-9750 Plus  
Chapter 5

To find the mean and standard deviation for a probability distribution:

Input the values for the random variable into List 1

Input the probabilities into List 2

Find the mean and the standard deviation the way you would for a frequency table.

Binomial Probabilities:

To find the probability  $P(x = a)$

STAT

DIST (F5)

BINM (F5)

Bpd (F1)

Data: Var (F2)

Input the correct information for the problem

ENTER

You should now see the probability on your screen.
